DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 60-88 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanchar et al (US 5,477,703). Hanchar discloses a geothermal call and recovery system comprising: a rigid trough structure consisting of impermeable member barrier (26) which is flexible, said structure is composed of clay or sand (24) liner and can form two layers (see column 3, lines 60-67), a plurality of perforated recovery pipes (32), heat exchanger coil (62) made of copper or stainless steel, stackable tube assembly (40) surrounded by gravel, a cover (92), sand and fine clean soil or fill (29) and may consist of additional fill material and further more a heat pump unit (22) for heating or cooling a house or structure (see figure 1). Hanchar disclose the use of crushed stone and gravel surrounding barrier.
